DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-7, 17-28, and 30, drawn to an isolated nematode persistently infected with an isolated pathogen, and a method of screening for a compound that inhibits a persistent pathogenic infection in a nematode, classified in classes 800 and 800, subclasses 8 and 3.
- II. Claims 8-16, 29, and 37, drawn to methods of screening for a virulence factor that enables a pathogen to develop a persistent infection in a nematode, wherein the pathogen is chemically mutagenized, classified in classes 435, 435, 435, and 435 subclasses 6, 7.1, 7.2 and 7.21.
- III. Claims 31-36, and 38-39, drawn to drawn to methods of screening for a virulence factor that enables a pathogen to develop a persistent infection in a nematode, wherein the pathogen expresses a gene that it normally does not express or overexpresses a pathogen gene, classified in classes 435, 435, 435 and 435, subclasses 6, 7.1, 7.2, and 7.21.

Although there are no provisions under the section for "Relationship of Inventions" in MPEP 806.05 for inventive groups that are directed to different methods, restriction is deemed to be proper between groups I-III, because their methods appear to constitute patentably distinct inventions, each with a distinct purpose and further

comprising distinct methodologies and using different products. For example, the methods of Group I are directed to screening for compounds that inhibit a persistent pathogenic infection in a nematode, the method of Group II is directed to identifying a virulence factor in a pathogen, wherein the pathogen is chemically mutagenized, and the method Group III is directed to identifying a virulence factor in a pathogen, wherein the pathogen expresses genes abnormally. Because these inventions are distinct for the reasons given above and a separate search is required for each of Groups I-III, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
